

At home

spring

As you walk collect some items from the woodland floor that will remind you of your visit fallen petals, twigs in bud blown down in the wind, lichen, cones etc.

When you get home, find a small place in your garden or find an old shallow container and create your own woodland spring garden.

Plant any recently fallen twigs with leaf buds, keep them watered and watch the buds burst into leaf!

If you have any cress, grass or flower seeds you could sow a glade in your woodland garden.
