

# Waiting to meet you

winter

There is a special tree in every woodland just waiting to meet you!

Find a thin stick and some wet mud. Use the stick to trace with mud the 2, 3 or 4 main lines on your palm (alternatively use a pen to mark these lines clearly).

Look carefully at this pattern, for the special tree you need to find will have this pattern too.

Look for it in the big branches, in the tiny twigs or in the bark.  
Some of you may have further to explore than others but your tree will be there, waiting.
