

# Woodland windows

Summer

As you walk in the woodland you may find a woodland window – a place to look through at the woods beyond. A window in the leaves, between the branches, or a knot hole that lets you peer inside the tree itself. Be still for a while and look – you may discover some surprising finds.

You could build your own window that you can take with you on your walk. Look for sticks and long grasses, then bind the sticks into a window frame using the grasses.
