

How to use the LAB

Make your own fab resources in the **nature detectives LAB**

Step 1 – create a folder

Make a note of your username and password!

If you forget them you won't be able to access any of your saved sheets :O(

Step 2 – create a sheet

Start with the blank sheet or use a template from the template folder

Give it a title and drag pictures, text, tick boxes and other fab stuff onto your sheet

Arrange them however you like - make stuff bigger, smaller, even rotate it!

Step 3 – upload your nature pics

Use your own photos on your sheet! Click on 'add my picture' to add one to your 'My pictures' folder

Step 4 – scrap it

Don't like your sheet? Hit the 'clear' button to get rid of everything and start again

Step 5 – save it

Click save and give your sheet a name

Step 6 – USE IT!

Now it's saved there's loads of cool stuff you can do: print it, share it, submit it to nature detectives...

The best and most interesting sheets might get uploaded to the website!
