

Stick 10 pictures (or draw your own) on the outer ring.

Cut around the outside of the disc to make the bottom of your **idial**

Now make a cover on the next page...

Decorate this cover to match the theme of your idial.

Cut around the outside (don't forget to cut into the 'missing segment').

Put the cover on top of your disc and join them so that it spins:

You could use a split pin through the middle, or push a drawing pin into a cork.

Spin the cover so that the arrow points to the picture you want to identify.

The inside segment will be revealed. Spin the cover and write your answers in.

Now take your idial out and see if it works in real life!
