

Make a Zooomer

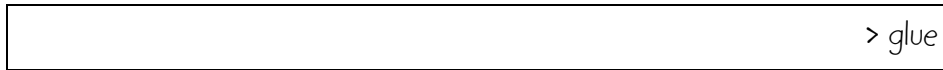

This handy little tool won't make things bigger...

but it will help your eyes Zooooooom in on small things!

1

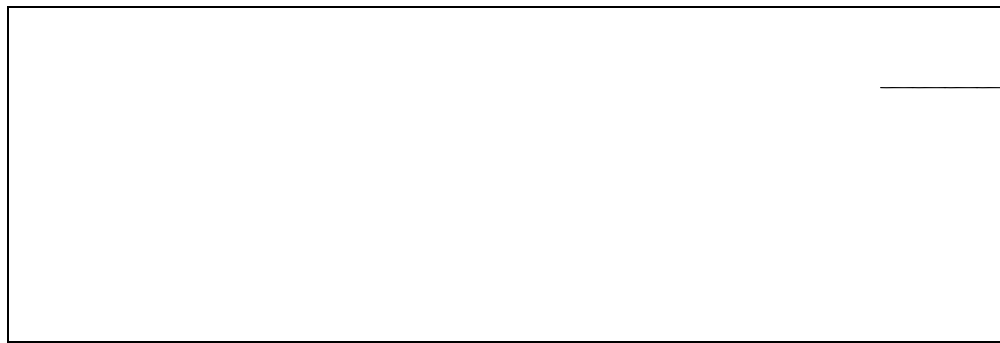

First, make a zooom eye. Cut out this strip:

Make it into a circle and stick it together.

2

Time to make a handle! Now cut out this strip:

Roll it into a long tube, like a straw, and stick it together.

3

Flatten one end of the straw together.

Cut a 1cm slit down the line, so that the scissors cut through both sides of the straw.

4

You should now be able to fold two flaps down.

Stick the flaps onto the zooom eye to make a magnifying glass shape.

5

What can you find outside? Here are some ideas to look at and draw:

bud petal bark leaf moss lichen
